THE JOURNAL OF MATHEMATICAL BEHAVIOR

VOLUME 23 **2004**

TITLE INDEX

B

Ben's consolidation of knowledge structures about infinite sets. Tommy Dreyfus and Pessia Tsamir, 3: 271

C

Classroom mathematical practices and gesturing. Chris Rasmussen, Michelle Stephan and Karen Allen, 3: 301

Comparing representations and reasoning in children and adolescents with two-year college students. Barbara Glass, 4: 429

Construction of meaning: urban elementary students' interpretation of geometric puzzles. Jill A. Marshall, 2: 169

Control decisions and personal beliefs: their effect on solving mathematical problems. Carol M. Lerch, 1: 21

F

Factors affecting the process of proficient mental addition and subtraction: case studies of flexible and inflexible computers. Ann M. Heirdsfield and Tom J. Cooper, 4: 443

E

Epistemological messages conveyed by three high-school and college mathematics textbooks. Manya Raman, 4: 389

I

Imaginative teaching, creative learning. Carolyn A. Maher, 3: 257

Improving evidential argumentation through statistical sampling: evaluating the effects of a classroom intervention for at-risk 7th-graders. Helena P. Osana, Erin Patria Leath and Shelley E. Thompson, 3: 351

M

Mathematical self-schema: a framework for analyzing adults' retrospection on high school mathematics. Ronnie Karsenty, 3: 325

Mathematical reasoning in calculus textbook exercises. Johan Lithner, 4: 405

P

Placenticeras: evolution of a task. Bob Speiser and Chuck Walter, 3: 259

R

Rationals and decimals as required in the school curriculum. Part 1: Rationals as measurement. Guy Brousseau, Nadine Brousseau and Virginia Warfield, 1: 1

Reflective abstraction, uniframes and the formulation of generalizations. Bharath Sriraman, 2: 205

S

Small-group searches for mathematical proofs and individual reconstructions of mathematical concepts. Draga Vidakovic and William O. Martin, 4: 465

Supporting the development of algebraic thinking in middle school: a closer look at students' informal strategies. Debra I. Johanning, 4: 371

Symbol sense with a symbolic-graphical system: a story in three rounds. Nurit Zehavi, 2: 183

T

Teacher and students' joint production of a reversible fraction conception. Ron Tzur, 1: 93

The role of operating premises and reasoning paths in upper elementary students' problem solving. Carmel M. Diezmann, 1: 63

The wholes that are greater than the sum of their parts: employing cooperative learning in mathematics teachers education. Roza Leikin, 2: 223

doi:10.1016/S0732-3123(04)00052-5

Traditional instruction in advanced mathematics courses: a case study of one professor's lectures and proofs in an introductory real analysis course. Keith Weber, 2: 115

U

Using interactive algebra software to support a discourse community. Azita Manouchehri, 1; 37

W

What is the meaning of "meaning"? A case study from graphing. Wolff-Michael Roth, 1: 75

Why do U.S. and Chinese students think differently in mathematical problem solving? Impact of early algebra learning and teachers' beliefs. Jinfa Cai, 2: 135
